Protect your investment

Good maintenance begins at home and continues with regular professional appointments.

Brush gently

Support the attachment area and brush from the ends upward with an extension-friendly brush.

Keep attachments clean

Use professional extension-safe products and avoid heavy oils or conditioner directly on attachments. Avoid chlorine and salt water, or use appropriate protective products when swimming.

Dry thoroughly

Never leave roots, tapes, beads or bonds damp. Dry the attachment area completely after washing.

Protect overnight

Never sleep with wet hair. Secure dry hair in a loose braid or low ponytail before bed, and wear a silk bonnet for extra protection.

Use heat protection

Protect both natural and extension hair, and keep hot tools away from tapes and keratin bonds.

Keep maintenance bookings

Do not stretch appointments past the recommended timeframe. Early care helps prevent matting and tension.
